

# Jumping Equipment

# Heritage Products

Heritage Products produces the most practical and safest jumping equipment for the equestrian sport. The jumps are produced inhouse with highly durable polymers that require hardly any further maintenance. So say goodbye to your yearly painting routine and stop worrying about poles laying on the ground. Heritage Products offers you the equipment that will let you focus on what you love doing and where your profits come from.

## Philosophy and vision

From the beginning of our brand, we have had a strong focus on safety in designing the products. Every new product has to be the safest we can make. We carefully select the polymer raw materials for this and every new product idea is thoroughly tested before it gets introduced in the market. The products are safe to touch because there are no splinters. Also there will not be sharp and dangerous edges when a jumps falls over or breaks in any way. We always minimize the potential for horses or riders to get hurt by the jumps in case there is an accident.

## Inhouse production

Most of the production steps are taken inhouse at Heritage Products in Sambeek. This means we can have control over the quality and the proces of all items. It gives us the opportunity to innovate and design with our filosphy and vision about functionality and safety as main drivers. Furthermore, we can cater to client specific wishes and deliver custom work when needed and work with short delivery times from order to finished products.

## Worldwide service and dealers

We have worked hard to build up a large network of dealers and importers of our products. This has accumulated into a presence in more then 20 countries and sales all around the world. No matter where you are located, we will always try to find a way to get our products to your place and give the service you can expect from us.

# Training jumps

The training jumpstands by Heritage Products are well known amongst riders for their practicality and safety. This line has been in production the longest. The base of the jumpwings is a fully colored PVC rectangular frame on tough polymer flat feet. These wings can be complimented by vertical bars, decorative plates or both.

Colors of these decorative items and the frames themselves can be chosen separately to create a colorful jump. The frames are also available in smaller version to act as a standing filler matching the looks of the jump. The jumping poles in these training jumps are a unique design with a polymer outside and a wooden insert. This assures a good weight, strength and also durability, safety and ease of maintenance.

Options for the stands and wings:

## Technical characteristics Jumpwings and filler:

Size: 155x50cm for the wings, 144/95x50cm for the filler

Weight: 15kg for the wings, 5kg for the filler

Materials: Frames and decoration: PVC

Feet: recycled polymers

Colors available: Red, White, Green, Blue, Yellow, Black, Purple

Standard keyhole rails on the wings

# Competition jumps

Following the training jumps, Heritage Products has started a line of dedicated competition jumps. These jumps are higher and wider than the training jumps and feature more visual variation with the designs. Complemented with various obstacle decoration like water trays and filler these jumps are fit for any course. Heritage Products has designed a series of standard wings. However, given the inhouse production we can also design jumps specific to customer preferences and wishes.

To create the designs, Heritage Products uses special 15mm thick fully colored HDPE material. These boards are extremely durable and safe for horse and rider. They require practically no maintenance and can be switched when needed.

## Fillers for the competition jumps:

To complement the jumps, Heritage product offers standing fillers and hanging fillers in various designs. The fillers are produced from the same profiles and boards as the jumps to match. Custom designs are also possible.

## Technical characteristics Jumpwings and filler:

Size wings: 180x60cm

Weight: 15-25kg

Materials: Frames: PVC, boards: HDPE

Feet: recycled polymers

Colors available: Red, White, Green, Blue, Yellow, Black, Purple

Standard keyhole rails

# Sponsor jumps

The equestrian sport is a superb opportunity to showcase your company to a broad and interesting crowd. Traditionally the sport has always been attracting attention from local amateur riders, large professional breeders and everybody in between. International events attract spectators from around the world while locally organized competitions are visited by people from all walks of life. Furthermore, with new online streaming platforms, the sport and the jumps are getting more exposure than ever before. Heritage Products helps your company in promoting itself to this interesting group of potential customers. We have experience in designing jumps to fit both your company brand and international FEI regulations.

Heritage Products uses powerful applications and machines to create lifelike drawings and turning them into highly durable and stunning sponsor jumps. We will make sure your brand gets the attention it deserves with perfectly fitting jumps.

Options for the stands and wings:  
Classic with PVC sheet - Classic with Dibont panel - Custom design

## Technical characteristics Jumpwings and filler:

Size wings: 180cm high. 60-70cm wide

Weight: 15-25kg

Materials: Frames and decoration: PVC

Feet: recycled polymers

Colors available: Red, White, Green, Blue, Yellow, Black, Purple

Standard keyhole rails

# Jumping poles

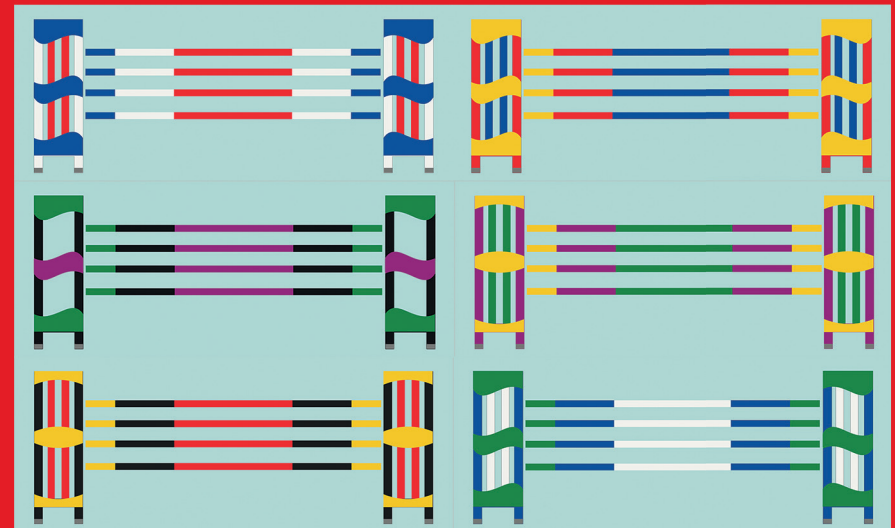

Heritage Products produces the unique jumping poles from a combination of fully colored polymer tube profiles and solid round wooden poles. These materials together create the perfect jumping pole. The poles are consistent and constant in weight, are maintenance free and will last longer than traditional wooden poles. The poles will not splinter and because of the fully colored profiles they will keep their color even when they get scratched en hit in normal usage. This will benefit the user in training as well as a company using a jump as promotion for their brand. We produce the poles in Sambeek, keeping a close eye on quality standard and neat delivery to the customer.

Bottom left is the standard layout of the jumping pole with 5 sections (3x a color and 2x White). These poles are available from stock. Other variations and custom layouts are available on request.

Colors available: Red, White, Green, Blue, Yellow, Black, Purple  
Standard design: 5 parts, 3x color - 2x White

## Variations on the standard jumping pole:

### Technical characteristics Jumping poles:

Size: Ø 9cm. Lengths up to 3,5m possible.

Standard stock on 3m

Weight: Approximately 13kg

Materials: Polypropylene tubing, Polyethylene caps

Inserts: untreated pinewood. heartwood cut

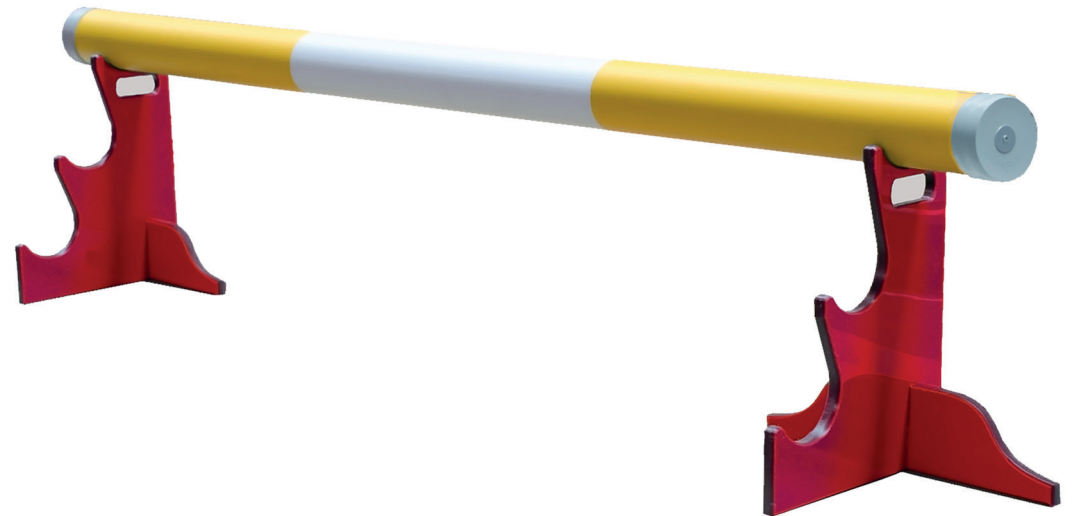

# Accessories

All the jumps can be made complete with a variety of accessories. These include the cups to hold the poles, flags to indicate direction, water trays and numbersets. Heritage Products has chosen to use the industry standard 24mm keyhole rails and matching cups for its jumps. We believe this is the best and most widely used system in the equestrian sport. Therefore the jumps we make are compatible with most of the available accessories you may already own. Where we can, Heritage Products makes its own items to complement the jumps like numbered cones to assign numbers to jumps in a course and cavaletti for training purposes. All accessories share the same vision and philosophy as the rest of the jumping equipment. So they are safe, practical and low in maintenance.

## Cavaletti Birkhof:

This innovation came about in cooperation with Jurgen Casper of Gestüt Birkhof. The triangular sides makes this the safest cavaletti to use, specially with a horse on a lunge.

Cavaletti stands: Red, Green, Blue, Yellow, Black  
Compatible with poles up to 10cm diameter.

Radioweg 7, 5831 JL Sambeek
